***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-17, 31 and 32 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The “first algorithm,” “second algorithm,” “third algorithm,” “fourth algorithm,” “fifth algorithm,” and “sixth algorithm” are insufficiently disclosed in the specification.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3662

4. Claims 1-15, 17-32 and 34 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Tennison et al.

Tennison et al disclose the claimed method and system for locating and tracking a wireless device. Figure 1 shows the mobile platform comprising a GPS receiver 12, sensors 22, control processor 24 and transceiver 26 and Figure 2 shows the central controller comprising transceiver 52, tracking application server 54 having a database 56 and interfaces 60 four coupling to graphical user interfaces or clients over the internet. The client 62 has the capability of controlling the timer of the mobile platform for controlling when to collect and send data at/from the mobile platform.

5. Claims 1-15, 17-32 and 34 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Brown.

Brown discloses the claimed system and method for tracking a wireless device including, as shown in Figure 2, the wireless device having a location unit 12 and, as shown in Figure 5, user 17 requesting information regarding wireless device 12 and remote web host 64 wirelessly connected to the wireless device 12.

6. Claims 1-15, 17-32 and 34 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Eliot.

Eliot discloses the claimed system and method for locating and tracking a wireless device 12 comprising a database 26 remotely located from the wireless device, a wireless network 16 for communicating between wireless device and the database and various user request means for providing the position information of the wireless device including parent internet access, parent call access, panic button, etc.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 16 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over any one of Tennison et al, Brown or Elliot.

Each of Tennison et al, Brown or Elliot teach the subject matter substantially as claimed including a wireless device to be monitored, which device is operable using a battery source. It is well-known that battery sources' power supply drain upon use. In view of the desired uses of the three prior art patents for providing tracking in the event of theft or abduction, it would have been obvious to the skilled artisan to modify the wireless devices such that a location message would be transmitted upon detection of a battery level reaching a threshold beyond which the device would be inoperative so as to provide an updated track of the stolen or abducted device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory C. Issing whose telephone number is (703)-306-4156. The examiner can normally be reached on Mon-Thurs 6:30-5:00.
